Hallmark pathways before and during nivolumab
Before treatment
On vs Pre, by response
Interferon−gamma response
Interferon−alpha response
Allograft rejection (T−cell killing)
Inflammatory response
E2F targets
G2M checkpoint
MYC targets
Mitotic spindle

PR/CR vs PD
PR/CR
SD
PD
Number = normalized enrichment score. Orange = higher in PR/CR (left) or on treatment (right); grey = FDR >= 0.05.
